Host HER 1531

HER
1531

Identification

Genus	*Species*	*Subspecies*	*Biovar*	*Serovar*
Cellulophaga	*baltica*			

Strain	*Aliases*
18	

Growth conditions

Temp.	*Medium*	*Aerobic/Anaerobic*	*Agitation*	*Other*
Room temp.	Zobell agar MLB broth		Agitation needed	

Lysogeny

Phage sensitivity

HER 531 (Cba181)

Reference

Remark
Takes three days to grow on Zobell agar pates, 16-20 hours to reach stationary phase in MLB, doubling time in MLB is 2-3 hours.

History

History

Received from

Prof. Matthew Sullivan, Center for Microbial Interface Biology, Ohio State University,
484 W. 12th Ave. Columbus, OH 43210

Date

December 2016

Isolated by

Dr. Karin Holmfeldt, Department of Biology and Environmental Science, Linnaeus
University, 391 82 Kalmar, Sweden
