

HER number 604				
Identification				
Name 604	Morphotype Siphophage	Other designation	S	
Taxonomy				
Realm	Kingdom	Phylum	Class	
Order	Family ?1	Genus Jouyvirus	Species Jouyvirus ev017	
Images				
Electron Micrograph		Image description	Image description	
Characteristics Temperate phage Requires CaCl2 (5 mM) and MgSO4 (10 mM)		Activated	Genomic sequence Activated	
Propagation	conditions			
Bacterial hosts 1598				
	n, M., Deng, L. et al. Virulent infectious than temperate co			
Remarks				

History
