

HER  
1325

## Identification

|                               |                            |                    |                    |
|-------------------------------|----------------------------|--------------------|--------------------|
| <i>Genre</i><br>Lactobacillus | <i>Espèce</i><br>plantarum | <i>Sous-espèce</i> | <i>Souche</i><br>A |
|-------------------------------|----------------------------|--------------------|--------------------|

*Autres désignations*

## Conditions de croissance

|                    |                      |                          |                  |   |
|--------------------|----------------------|--------------------------|------------------|---|
| <i>Temp.</i><br>30 | <i>Milieu</i><br>MRS | <i>Aérobic/Anaérobic</i> | <i>Agitation</i> | <i>Autres</i><br>10mM CaCl <sub>2</sub> ,<br>10mM MnCl <sub>2</sub> |
|--------------------|----------------------|--------------------------|------------------|---|

## Lysogénie

## Sensibilité phagique

HER 325 (fri (not available))

### *Référence*

Trevors K.E., R.A. Holley and A.G. Kempton. 1983. Isolation and characterization of a Lactobacillus plantarum bacteriophage isolated from a meat starter culture. Journal of Applied Bacteriology 54:281-288.

### *Remarque*

Requires frequent subculture in broth (48-72h)

## Historique

*Historique*

**Received from**

Miss Karen Trevors, Dept of Biology, Faculty of Science,  
University of Waterloo, Waterloo, ontario, CANADA

**Date**

05-25-1988

**Received from**

Rick A. Holley, Food Research Institute, Agriculture  
Canada, Ottawa, Ont., Canada

**Date**
