Identification

<i>Genre</i> <i>Bacillus</i>	<i>Espèce</i> <i>thuringiensis</i>	<i>Sous-espèce</i>	<i>Biovar</i>	<i>Sérovar</i>
<i>Souche</i> B16		<i>Autres désignations</i>		

Conditions de croissance

<i>Temp.</i> 32	<i>Milieu</i> LB	<i>Aérobic/Anaérobic</i>	<i>Agitation</i>	<i>Autres</i>
--------------------	---------------------	--------------------------	------------------	---------------

Lysogénie

Sensibilité phagique

Référence

Verheust, C., N. Fornelos, and J. Mahillon. 2005. GIL16, a new gram-positive tectiviral phage related to the *Bacillus thuringiensis* GIL01 and the *Bacillus cereus* pBClin15 element. J.Bacteriol. 187:1966-1973.

Remarque

The serovar of this strain remains unknown since it has only been recently identified as a *Bacillus thuringiensis* strain. B16 harbours the linear prophage pGIL16 and naturally releases GIL16 viral particles into the medium.
